(a) accuracy saturates at J = 4–5
shipped J = 4
mean correction only (2 MLPs)
+ off-diagonal covariance (3 MLPs)
final-layer MSE gain over k=2
J = number of carried sources
(b) cost-aware optimum
mean correction only
+ off-diagonal covariance
adjusted score (log, 3 MLPs)
11.9%
15.0%
17.8%
20.4%
24.8%
J (labels: % of budget, Strassen level 1)
